Offering Superior Safety & Efficiency

FEDERAL SIGNAL | Sonetics® | BRIGADE®

Reverse Camera/Monitor Systems, from Federal Signal, provide the driver with an expanded field-of-view for enhanced safety during back-up or while maneuvering the vehicle in challenging environments.

Sonetics headsets offer superior voice quality so you can understand what you're hearing. Hands-free like your cell phone, but without the noise! No radio or licenses required, and it's completely secure and encrypted!

Brigade's bbs-tek® multi-frequency reversing alarms use a wide range of White Sound® frequencies. This enables the listener to instantly locate where and what direction the sound is coming from.
