

TRACKLESS BOOM FLAIL MOWER

The Trackless Boom Flail Mower is perfect for those difficult, unsafe or impossible areas to mow. Ditches, steep inclines, over guard rails and waters-edge are areas in which the boom flail excels. Hydrostatic speed control allows the operator to react to oncoming obstacles for optimum safety and productivity.

Can be removed from the Trackless MT in approximately 10 minutes. Within minutes another attachment can be installed and the operator can be on the way to another job site.
