

## COMBO VAC SERIES

### Westech Vac Systems

Westech Vac Systems designs and builds rugged, reliable vacuum truck systems for the toughest industrial cleaning applications in oil and gas, utilities, industrial and municipalities. Westech Vac Systems are available as TC 407 Transport Dangerous Goods Certification or non-code and can handle the unpredictable off-road applications and the unknown hazardous materials, in every type of weather, from the freezing cold of winter or the heat and humidity of summer – (40 C to -40 C below / 95 F to -40 F).

For almost 30 years Westech's philosophy has remained the same, build a premium product with a flexible design, customized to meet customer requirements and exceed expectations. Westech products are built for the long haul, holding their value well beyond competitive products.

Each unit features quick and easy setup so work can begin immediately, maximizing efficiency and productivity. And every new truck comes with the exclusive Federal Signal RightStart program, ensuring customers are trained from the first turn of the key the safest, most productive operation methods possible. Westech products are backed by strong service and support as well as application expertise throughout the product life.

Westech Vac Systems is the newest member of the Federal Signal Environmental Solutions Group, which includes the leading brands of Elgin street sweepers; Guzzler industrial vacuum trucks; Jetstream high-performance waterblasting equipment; and Vector sewer cleaners and vacuum excavators for commercial, municipal and industrial customers. The Environmental Solutions Group also includes FS Solutions, which offers unsurpassed expertise and a unique breadth of environmental cleaning equipment, parts, rental, service and training to meet the needs of industrial cleaning professionals.

## Combo Vacs:

### Standard Features:

- Available vacuum systems:
  - Fruitland 500 – 320 CFM – 28" Hg.
  - Hibon 810 – 860 CFM – 28" Hg.
  - Hibon 820 – 1,300 CFM – 28" Hg.
- TC 407 TDG tank
- Water compartment capacities from 630 imperial gallons (760 U.S. Gal) to 1,200 imperial gallons (1,440 U.S. Gal)
- Debris compartment capacities from 5 Cu. M (6.5 Cu. Yrd.) to 12 Cu. M (15.6 Cu. Yrd.)
- Axle configurations available in single, tandem, and tridem configurations
- 10 GPM @ 2,800 PSI Cat 660 water pump
- 3/8" x 150' water hose mounted on electrically operated extend/retract reels
- Body hoist offloading debris compartment
- Single cyclone filter
- 4" and 6" NVE rear door valves
- Rear door valves heated
- Cyclone drain valve
- 6 rear door locking pinwheels
- Code compliant pressure relief valve
- Epoxy coated water compartment
- 2 rear mounted LED work lights
- 1 driver side LED work light
- 1 passenger side LED work light
- Squeegee and shovel storage rack
- 660,000 BTU boiler
- Steam cleaning kit and hose reel – 3/8" x 75' Whitewater steam hose mounted on electrically extended/retract reels

- Hose reel cabinet heated
- Glycol winterization system
- Air purge winterization system
- 20" manway access to water compartment
- LED tail lights
- Manual pressure/vacuum 4-way valve
- TC 407 fixed rear bumper

### Optional Feature:

- 6" extendable boom with pendant control on Hibon 820 model
- Wireless boom control
- Large van body enclosure
- Coated debris compartment
- Debris compartment dip port
- Chemical system
- Pneumatic air reel
- 110V electrical outlet
- Wrench rack
- Washdown pump upgrades up to 20 GPM @ 3,600 PSI
- Boiler upgrades to 980,000 BTU
- Pylon holder
- Extra lockable toolbox storage
- TC 407 flip-up rear bumper with Pintle hitch
- Raised deck for float tire clearance
- Additional LED work lights
- Additional cabinet heater
- Tire chain racks
- Multi-pin placard
