

TRAILER VAC SERIES

Westech Vac Systems

Westech Vac Systems designs and builds rugged, reliable vacuum truck systems for the toughest industrial cleaning applications in oil and gas, utilities, industrial and municipalities. Westech Vac Systems are available as TC 407 Transport Dangerous Goods Certification or non-code and can handle the unpredictable off-road applications and the unknown hazardous materials, in every type of weather, from the freezing cold of winter or the heat and humidity of summer – (40 C to -40 C below / 95 F to -40 F).

For almost 30 years Westech's philosophy has remained the same, build a premium product with a flexible design, customized to meet customer requirements and exceed expectations. Westech products are built for the long haul, holding their value well beyond competitive products.

Each unit features quick and easy setup so work can begin immediately, maximizing efficiency and productivity. And every new truck comes with the exclusive Federal Signal RightStart program, ensuring customers are trained from the first turn of the key the safest, most productive operation methods possible. Westech products are backed by strong service and support as well as application expertise throughout the product life.

Westech Vac Systems is the newest member of the Federal Signal Environmental Solutions Group, which includes the leading brands of Elgin street sweepers; Guzzler industrial vacuum trucks; Jetstream high-performance waterblasting equipment; and Vactor sewer cleaners and vacuum excavators for commercial, municipal and industrial customers. The Environmental Solutions Group also includes FS Solutions, which offers unsurpassed expertise and a unique breadth of environmental cleaning equipment, parts, rental, service and training to meet the needs of industrial cleaning professionals.
